## Projects

### 1. GetriPay - <https://online.getripay.com>

I worked on GetriPay at my current place of employment. GetriPay is a financial technology application which allows users within Nigeria have a bank account without going to a physical bank location. The frontend features I worked on includes: User management, Inter and intra bank fund transfers, bill payments (airtime, data, cable TV and utility bills), loan

### 2. GetriSave – Currently in testing stage

GetriSave allows users cultivate a saving habit, either individually or with a group. The frontend features I worked on includes: Creating a savings plan, auto-save, creating and joining a group savings amongst others.

### 3. GetriVest – Currently in testing stage

GetriVest is an investment platform that allows users to invest their funds. The frontend features I worked on includes: Allowing users subscribe to investment packages, single sign on from the parent application(GetriPay), allow users view their investment and progress, amongst others

### 4. GetriPay e-commerce – Currently in development

This is an ecommerce application that is currently in development. It allows users to create their own virtual shops and sell products, buyers can pay with several payment options including QR code

## Other Projects

1. **Covid-19 Dashboard-** <https://covid-19-nigeria-dashboard.herokuapp.com>

A COVID19 statistics dashboard for cases in Nigeria built with React, Redux, Bootstrap, Chart.js and others. It also contains data for each state in Nigeria that is searchable and also paginated

2. **Expense and income tracking App –** <https://react-expense-tracking-app.netlify.app>

A web application which allows you to keep track of your income and expenses, built with react, firebase (for authentication and storage), bootstrap, React context API, Chart.js

3. **You box –** <https://you-box.web.app>

A video uploading/streaming app built with react. It makes use of redux for state management, clouinary to manage video uploads, firebase for authentication and storing uploaded video links against a user, bootstrap for styling. You can upload a video, share video link with people, like and also comment on a video.

4. **Other project and information can be found on my portfolio-** <https://abimbola-bakare.netlify.app>

## Certifications

---

Tech Studio Academy (Full Stack Web development)  
(2020)

NYSC- National Youth Service Corps Certificate (2019)
